(2M/1-73)

C O N D I T I O N A L P E R M I T

All water appropriations are subject to prior water permits and in all cases where the use of water for different purposes conflicts such uses shall conform to the following order of priority as are set forth in the North Dakota Century Code:

1. Municipal and Domestic Use
2. Livestock Use
3. Irrigation and Industrial Use
4. Fish, Wildlife and Outdoor Recreation Use.

When the source of appropriation is from surface waters such as a lake, river, stream or reservoirs the rate of withdrawal shall not exceed 700 gallons per minute and the withdrawals are subject to the natural flows in or entering such lakes, rivers, streams or reservoirs unless otherwise modified by the State Engineer.

When the water is from an underground source, the State Engineer may, in order to determine the allowable quantity of water, the rate of withdrawal and the well spacing, require the applicant to provide acceptable pump test data and other pertinent information for that specific aquifer prior to approval of such application.

When the source of appropriation is from a river or stream for storage in a dam or reservoir, the rate of withdrawal shall not exceed the natural flows less the amount of flow needed for downstream domestic and livestock uses.

Prior to the granting of a Perfected Water Permit the rate of withdrawal and the acre-feet for any Conditional Permit are subject to modification by the State Engineer and failure to comply with any order of the State Engineer may result in forfeiture of this permit.

*** The well (or wells) shall be placed in such a location, constructed to such a depth and have such an efficiency that will not unreasonably restrict further development of the aquifer system.

Prior to the beneficial use of water, a continuous recording meter shall be installed on the discharge line to measure the quantity of water pumped from the well. The meter shall conform to specifications set forth by the North Dakota State Water Commission and be available for inspection by representatives of the Commission.

Failure to comply with any order of the State Engineer may result in forfeiture of water permit.

This is to certify that I have examined the foregoing application and hereby approve the same. subject to prior water permits. The rate of withdrawal is subject to the results of a pumping test and not to exceed 700 gallons per minute. ***
The amount of water to be appropriated shall be limited to the amount that can be used beneficially, not to exceed 175.0 acre feet each year. to irrigate 130.0 acres

1. Date of priority April 22, 1974
2. Date of hearing on application July 1, 1974
3. Date of approval by State Water Commission May 12 and 13, 1975
4. Water shall be beneficially used on or before July 1, 1979
